FOI 050-895460

A 3D bar chart illustrating the normalized intensity of a signal over a 40-minute period for four different conditions. The vertical axis represents 'Intensity (normalized)' from 0 to 1.0. The horizontal axis represents 'time (minutes)' from 0 to 40. The depth axis lists the conditions: 'mechanical shaking', 'acoustic', 'stagnant', and 'optimized acoustic'. The 'stagnant' condition shows a rapid decay to zero intensity by 20 minutes. The 'optimized acoustic' condition shows the most stable and highest intensity throughout the 40-minute period.

Time (minutes)	mechanical shaking	acoustic	stagnant	optimized acoustic
0	0.20	0.20	0.20	0.20
10	0.20	0.20	0.20	0.20
20	0.20	0.20	0.00	0.20
30	0.20	0.20	0.00	0.20
40	0.20	0.20	0.00	0.20
